

PAUL SUNNY ISOAGON JR

GoHighLevel (GHL) Automation Specialist — CRM, Marketing Automation & Custom Integrations

Philippines | paulsunnyisogon@gmail.com | GitHub: github.com/Hexx00r | paulsunnydev.com

SUMMARY

GoHighLevel automation specialist for service businesses — I build the native GHL side (pipelines, workflows, funnels, SMS/email follow-up) **and** the custom code layer most GHL freelancers can't touch: serverless webhooks, REST integrations, and technical SEO. Hands-on experience designing a complete end-to-end GHL system covering lead capture, qualification, booking, follow-up, review requests, and pipeline management.

SELECTED PROJECTS

quote-relay — production serverless webhook pipeline (Cloudflare Workers + D1) receiving quote-form leads and forwarding them to GoHighLevel and Telegram in real time, with multi-client routing — replacing third-party automation platforms. Runs 24/7 on the free tier.

paulsunnydev.com — owned end-to-end: design, build, technical SEO, content strategy, deploy pipeline. Prerendered React SPA (custom zero-dependency SSR build), 12+ search-targeted guides with intent-based keyword architecture and internal-link clustering for the Australian pressure-cleaning niche, Schema.org structured data (Person, ProfessionalService, FAQPage), sitemap/robots management — resolving client-side-rendering crawlability issues.

ghl-service-business-automation — open-source production GHL automation blueprint for property, cleaning, and trade service businesses (GitHub: Hexx00r).

HANDS-ON EXPERIENCE

Founder & Automation Builder — DJ Property & Cleaning Services (own business) — Current

Albury–Wodonga, NSW/VIC, Australia

Designed and built the complete GHL automation system for my own property & cleaning business, covering the full lead-to-job journey:

- Lead capture funnels with instant-quote calculator feeding directly into GHL pipelines
- Automated lead qualification with SMS/email follow-up workflows
- Booking calendar setup with automated appointment reminders
- Post-job review request automation to build social proof
- Pipeline management tracking every lead from first contact to booked job

GHL CORE SKILLS

Workflows & Automation: lead follow-up sequences, appointment reminders, nurture campaigns, review requests

Funnels & Forms: landing pages, lead capture forms, surveys, instant-quote calculators

Campaigns: SMS and email automation, lead nurturing

Pipelines & CRM: pipeline and stage setup, lead qualification, tagging, contact segmentation

Calendars & Booking: calendar setup, booking and reminder automation

Integrations: webhook handling, REST API connections, Make, third-party tools

TECHNICAL SKILLS (SUPPORTING)

Backend: Cloudflare Workers/D1 (serverless), Node.js, Python, Java (Spring Boot) • **Frontend:** JavaScript/TypeScript, React, HTML/CSS • **Integrations:** REST API design, webhooks, Postman, Make • **SEO:** technical SEO, Schema.org/JSON-LD, prerendering, sitemap/robots, Search Console • **Tools:** Git/GitHub (Actions CI/CD), AI-assisted development (ChatGPT, Claude, Kimi)

EDUCATION

Information Technology, Iligan City Computer Institute — Graduated 2014. Ongoing self-study via online courses, official documentation, and project-based learning.

LANGUAGES & AVAILABILITY

English — professional written proficiency, conversational spoken (actively improving) | Filipino/Tagalog — native.

Open to part-time and project-based GHL assistant work — workflow builds, funnel setup, booking automation, webhook/custom integrations, and ongoing CRM management.
