

PAUL SUNNY ISOAGON JR

AI Chatbot Developer & GoHighLevel Specialist | Full Stack Web Developer

Philippines (Remote) | paulsunnyisogon@gmail.com | paulsunnydev.com | github.com/Hexx00r

SUMMARY

AI chatbot developer and GoHighLevel specialist with full stack web development experience, focused on lead generation and automation for service businesses in Australia, the United States and the United Kingdom. I build fast, SEO-ready websites (Astro, React, Cloudflare), AI chat assistants that qualify enquiries around the clock and route urgent ones to a call-now path, and GoHighLevel systems that automate follow-up, booking and review requests, including the custom webhook and REST API layer that standard GHL builds do not cover.

CORE SKILLS

Services: AI chatbot development · AI integration · GoHighLevel setup & automation · CRM pipeline management · Lead-generation websites & landing pages · Speed-to-lead SMS/email follow-up · Website performance optimisation · Technical SEO

AI: AI chat assistants (lead qualification, emergency triage, per-message AI classification) · Claude, ChatGPT · Learning: MCP servers

Development: Astro 5 · React · JavaScript/TypeScript · Node.js · Cloudflare Workers, Pages & D1 · Python · Java (Spring Boot) · HTML/CSS · Git & GitHub Actions

GoHighLevel: Workflows & triggers · Pipelines & opportunities · Funnels & forms · Instant-quote calculators · Calendars & booking · SMS/email campaigns · Review requests · Tags & segmentation

Integrations & SEO: Webhooks · REST APIs · Make · n8n · Zoho CRM · Telegram · Postman · Schema.org/JSON-LD · Google Search Console

EXPERIENCE

AI Chatbot Developer & GHL Specialist, Freelance

Remote from the Philippines, serving AU, US and UK clients | Current

- **Melbourne High Pressure Cleaning** (San Remo & greater Melbourne): delivered a complete rebrand and lead-generation funnel build.
- Build complete GoHighLevel systems plus the custom code behind them: instant-quote calculator funnels with live pricing logic, pipeline & CRM automation, SMS/email follow-up sequences, booking calendars, review automation and webhook/REST API integrations.
- Build the Gawler Place Dental spec rebuild (see Featured Project) and a **Sydney Jet Wash** demo on the same zero-cost stack I deploy for clients.

GHL Automation Builder, DJ Property & Cleaning Services (family business)

Albury–Wodonga, NSW/VIC, Australia (remote) | Current

- Built the complete GHL system from scratch: instant-quote funnel, lead qualification and SMS/email follow-up workflows, booking calendars with reminders, pipelines and review automation. Published it as an open-source blueprint (**ghl-service-business-automation**).
- Built **quote-relay** (below) to deliver quote-form leads to GHL and Telegram in real time.

FEATURED PROJECT

Gawler Place Dental: website rebuild + smart chat assistant | Spec demo · Astro 5 · Cloudflare Pages · Cloudflare Workers · AI

Rebuilt an Adelaide CBD dental clinic's Wix website overnight as an unsolicited working demo.

- **Smart chat assistant** qualifies leads 24/7 (treatment, urgency, health fund) and routes emergencies to a call-now path. Real emergency detection: "toothache, face is swollen" never gets a FAQ answer.
- Cloudflare Worker as the lead backend, with an AI judgment on every message; about **\$0.00006** to process a qualified lead.
- Moved the buried \$199 new-patient offer into the hero; drag-to-compare before/after sliders; **~1 s mobile load** (old site: several seconds); \$0 hosting.
- AHPRA-aware content: no testimonials, practitioner registration shown, price ranges only.

SELECTED PROJECTS

quote-relay | Cloudflare Workers · D1 · GoHighLevel API · Telegram

Production serverless webhook pipeline that receives quote-form leads and forwards them to GoHighLevel and Telegram in real time, with multi-client routing. Runs 24/7 on Cloudflare's free tier.

paulsunnydev.com | React · custom SSR/prerender build · Schema.org

Prerendered React portfolio with a custom zero-dependency SSR build; 12-article SEO cluster for Australian pressure-cleaning keywords; JSON-LD structured data.

EDUCATION, LANGUAGES & AVAILABILITY

Information Technology, Iligan City Computer Institute | Graduated 2014

English: professional written, conversational spoken | **Filipino/Tagalog:** native

Open to: remote freelance projects, contract work and full-time or part-time roles.
